

IETF Intellectual Property Management
Technical Legal Provisions Relating to IETF Documents
version 6.0

Effective Date: January 01, 2026

1. Background

The IETF Intellectual Property Management Corporation (IETF IPMC) was formed in December 2023 as the successor to the IETF Trust.

Accordingly, pursuant to RFC XXXX [new 5378], Contributors grant the IETF IPMC certain licenses with respect to their IETF Contributions. In RFC 5377, the IETF Community has provided the IETF Trust and now applied to its successor the IETF IPMC, with guidance regarding licenses that the IETF IPMC should grant to others with respect to such IETF Contributions and IETF Documents.

These Technical Legal Provisions describe the rights and licenses that the IETF IPMC grants to others with respect to such IETF Contributions and IETF Documents; as well as certain restrictions, limitations and notices relating to IETF Documents.

These Technical Legal Provisions do not apply to other document streams that have requested that the IETF IPMC act as licensing administrator. Those other document streams are covered in separate Technical Legal Provisions appropriate for each document stream..

Capitalized terms used in these Technical Legal Provisions that are not otherwise defined have the meanings set forth in RFC NEW-5378.

. .

1.1 History

TLP	Source	Date Published	Date Effective	Date Obsoleted
6.0	www.ietf-ipm.com/tlp	xxxx,2005	Jan 1,2026	
5.0	trustee.ietf.org/documents/trust-legal-provisions/	Mar 25, 2015	Mar 25,2015	Jan 1, 2026
4.0	trustee.ietf.org/documents/trust-legal-provisions/	Dec 29, 2009	Dec 28,2009	Mar 25,2015
3.0	trustee.ietf.org/documents/trust-legal-provisions/	Sept 5, 2009	Sept 12,2009	Dec 28,2009
2.0	trustee.ietf.org/documents/trust-legal-provisions/	Feb 12, 2009	Feb 15, 2009	Sept 12,2009
1.0	trustee.ietf.org/documents/trust-legal-provisions/	Nov 11,2008	Nov 10,2008	Feb 15,2009

Prior versions of this document when owned by the IETF Trust have been referred to by the title

“Trust Legal Provisions” and commonly referred to as the TLP. The title Technical Legal Provisions has been chosen to maintain the common TLP name.

2. Applicability of these Technical Legal Provisions.

a. These Technical Legal Provisions are effective as of January 1, 2026 (the “Effective Date”).

b. The licenses granted by the IETF IPMC pursuant to these Technical Legal Provisions apply only with respect to (i) IETF Contributions (including Internet-Drafts) that are submitted to the IETF following the Effective Date, and (ii) IETF RFCs and other IETF Documents that are published after the Effective Date.

c. IETF Contributions made, and IETF Documents published, prior to the Effective Date (“Pre-Existing IETF Documents”) remain subject to the licensing provisions of the IETF copyright policy document in effect at the time of their contribution or publication, as applicable, including RFCs 1310, 1602, 2026, 3978, 4748 and 5378 and previous versions of these Technical Legal Provisions.

d. In most cases, rights to Pre-Existing IETF Documents that are not expressly granted under these RFCs can only be obtained by requesting such rights directly from the document authors. The IETF IPMC does not become involved in making such requests to document authors.

e. These Technical Legal Provisions may be amended from time to time by the IETF IPMC in a manner consistent with the guidance provided by the IETF community and its own operating procedures. Any amendment to these Technical Legal Provisions shall be posted for review at <http://www.ietf-ipm.com/tlp> and shall become effective on a date specified by the IETF IPMC, but no earlier than thirty (30) days following its posting. Such amendment shall apply with respect to all IETF Contributions made and IETF Documents published following the effective date of such amendment. All prior versions of these Legal Provisions from the IETF Trust shall continue to be posted at <http://trustee.ietf.org/documents/trust-legal-provisions> and for the IETF IPMC posted at <http://www.ietf-ipm.com/tlp> for reference with respect to IETF Contributions and IETF Documents as to which they may apply.

f. The IETF Trust assigned to the IETF Intellectual Property Management Corporation all the rights that had been granted to it under RFC5378 and RFC 5738’s predecessors as well as contributions cited in the founding IETF Trust Agreement and other rights granted to it by third parties.. Mentions of the IETF Trust in IETF Contributions and IETF Documents are understood to refer to the IETF IPMC after the effective date of these Technical Legal Provisions version 6.0.

3. Licenses to IETF Documents and IETF Contributions.

a. *License For Use Within the IETF Standards Process.* The IETF IPMC hereby grants to each participant in the IETF Standards Process, to the greatest extent that it is permitted to do so, a non-exclusive, royalty-free, worldwide right and license under all copyrights and rights of authors granted to the IETF IPMC:

i. to copy, publish, display and distribute IETF Contributions and IETF Documents, in whole or in part, as part of the IETF Standards Process, and

ii. to translate IETF Contributions and IETF Documents, in whole or in part, into languages other than English as part of the IETF Standards Process, and

iii. unless explicitly disallowed in the notices contained in an IETF Contribution or IETF Document (as specified in Section 6.c below), to modify or prepare derivative works of such IETF Contributions or IETF Documents, in whole or in part, as part of the IETF Standards Process.

b. *IETF Standards Process.* The term IETF Standards Process has the meaning assigned to it in RFC NEW-5378. In addition, the IETF IPMC interprets the IETF Standards Process to include the archiving of IETF Documents in perpetuity for reference in support of IETF activities and the implementation of IETF standards and specifications.

c. *Licenses For Use Outside the IETF Standards Process.* In addition to the rights granted with respect to Code Components described in Section 4 below, the IETF IPMC hereby grants to each person who wishes to exercise such rights, to the greatest extent that it is permitted to do so, a non-exclusive, royalty-free, worldwide right and license under all copyrights and rights of authors:

i. to copy, publish, display and distribute IETF Contributions and IETF Documents in full and without modification,

ii. to translate IETF Contributions and IETF Documents into languages other than English, and to copy, publish, display and distribute such translated IETF Contributions and IETF Documents in full and without modification,

iii. to copy, publish, display and distribute unmodified portions of IETF Contributions and IETF Documents and translations thereof, provided that:

(x) each such portion is clearly attributed to IETF and identifies the RFC or other IETF Document or IETF Contribution from which it is taken,

(y) all IETF legends, legal notices and indications of authorship contained in the original IETF RFC must also be included where any substantial portion of the text of an IETF RFC, and in any event where more than one-fifth of such text, is reproduced in a single document or series of related documents.

d. *Licenses that are not Granted.* The following licenses are not granted pursuant to these Technical Legal Provisions:

i. any license to modify IETF Contributions or IETF Documents, or portions thereof (other than to make translations or to extract, use and modify Code Components as permitted under the licenses granted under Section 4 of these Technical Legal Provisions) in any context outside the IETF Standards Process, or

ii. any license to publish, display or distribute IETF Contributions or IETF Documents, or portions thereof, without the required legends and notices described in these Technical Legal Provisions.

e. *Requesting Additional Rights.* Anyone who wishes to request license rights from the IETF IPMC in addition to those granted under these Technical Legal Provisions may submit such request to toipm-requests@ietf.org.

Such requests will be considered by the IETF IPMC, which will make a decision regarding the request in its sole discretion and inform the requester of its disposition.

In addition, individual Contributors may be contacted regarding licenses to their IETF Contributions. The IETF IPMC does not limit the ability of IETF Contributors to license their Contributions, so long as those licenses do not affect the rights granted to the IETF IPMC under RFC NEW-5378.

4. License to Code Components.

a. *Definition.* IETF Contributions and IETF Documents often include components intended to be directly processed by a computer ("Code Components"). A list of common Code Components can be found at <http://www.ietf-ipm.org/license-info>.

b. *Identification.* Text in IETF Contributions and IETF Documents of the types identified in Section 4.a above shall constitute "Code Components".

In addition, any text found between the markers <CODE BEGINS> and <CODE ENDS>, or otherwise clearly labeled as a Code Component, shall be considered a "Code Component".

c. *License.* In addition to the licenses granted under Section 3, unless one of the legends contained in Section 6.c.i or 6.c.ii is included in an IETF Document containing Code Components, such Code Components are also licensed to each person who wishes to receive such a license on the terms of the "Revised BSD License" also known as the "3-Clause BSD License", as described below.

If a licensee elects to apply the BSD License to a Code Component, then the additional licenses and restrictions set forth in Section 3 and elsewhere in these Technical Legal Provisions shall not apply thereto.

Note that this license is specifically offered for IETF Documents and may not be available for Alternate Stream documents. See the corresponding Technical Legal Provisions document for licensing information for the appropriate stream.

BSD License:

Copyright (c) <insert year> IETF Intellectual Property Management Corporation and the persons identified as authors of the code. All rights reserved.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

- Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.
- Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
- Neither the name of Internet Society, IETF, IETF Trust, IETF Intellectual Property Management Corporation or IETF IPMC nor the names of specific contributors, may be used to endorse or promote products derived from this software without specific prior written permission.

THIS SOFTWARE IS PROVIDED BY THE COPYRIGHT HOLDERS AND CONTRIBUTORS "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE COPYRIGHT OWNER OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

The above BSD License is intended to be compatible with the Revised BSD also known as the 3-Clause license, Revised BSD License template published at <https://opensource.org/license/BSD-3-Clause>

d. *Attribution.* Those who use Code Components under the license granted under Section 4.c above are requested to attribute each such Code Component to IETF and identify the RFC or other IETF Document or IETF Contribution from which it is taken. Such attribution may be placed in the code itself (e.g., "This code was derived from IETF RFC [insert RFC number]. Please reproduce this note if possible."), or any other reasonable location.

e. *BSD License Text.* For purposes of compliance with the redistribution clauses of the Revised BSD License set forth in Section 4.c above, it is permissible, when using Code Components extracted from IETF Contributions and IETF Documents, either (1) to reproduce the entire text of the Revised BSD License set forth in Section 4.c above as part of such Code Component, or (2) to include in such Code Component the legend set forth in Section 6.d below.

5. License Limitations.

a. *No Patent License.* The licenses granted under these Technical Legal Provisions shall not be deemed to grant any right under any patent, patent application or similar intellectual property right.

b. *Supersedure.* The terms of any license granted under these Technical Legal Provisions may be superseded by a written agreement between the IETF IPMC and the licensee

that specifically references and supersedes the relevant provisions of these Technical Legal Provisions, except that (i) the IETF IPMC shall in no event be authorized to grant rights with respect to any Contribution in excess of those which it has been granted by the Contributor, and (ii) the rights granted shall not be less than those otherwise granted under these Technical Legal Provisions.

c. *Pre-5378 Material.* In some cases, IETF Contributions or IETF Documents may contain material from IETF Contributions or IETF Documents published or made publicly available before November 10, 2008 as to which the persons controlling the copyright in such material have not granted rights to the IETF IPMC under the terms of RFC NEW-5378 (“Pre-5378 Material”). If a Contributor includes the legend contained in Section 6.c.iii of these Technical Legal Provisions on such IETF Contributions or IETF Documents containing Pre-5378 Materials, the IETF IPMC agrees that it shall not grant any third party the right to use such Pre-5378 Material outside the IETF Standards Process unless and until it has obtained sufficient rights to do so from the persons controlling the copyright in such Pre-5378 Material. Where practical, Contributors are encouraged to identify which portions of such IETF Contributions and IETF Documents contain Pre-5378 Material, including the source (by RFC number or otherwise) of the Pre-5378 Material.

6. Text To Be Included in IETF Documents. The following text must be included in each IETF Document as specified below. The IESG shall specify the manner and location of such text for Internet-Drafts. The RFC Editor shall specify the manner and location of such text for RFCs. The copyright notice specified in 6.b below shall be placed so as to give reasonable notice of the claim of copyright.

a. *Submission Compliance for Internet-Drafts.* In each Internet-Draft:

This Internet-Draft is submitted in full conformance with the provisions of BCP 78 and BCP 79.

b. *Copyright and License Notice.* In each Document (including RFCs and Internet-Drafts):

i. *Copyright and License Notice.*

Copyright (c) <insert year> IETF Intellectual Property Management Corporation and the persons identified as the document authors. All rights reserved.

This document is subject to BCP 78 and the IETF Intellectual Property Management Corporation’s Technical Legal Provisions Relating to IETF Documents (<http://www.ietf-ipm.org/license-info/>) in effect on the date of publication of this document. Please review these documents carefully, as they describe your rights and restrictions with respect to this document. Code Components extracted from this document must include Revised BSD License text as described in Section 4.e of the IETF Intellectual Property Management Corporation Technical Legal Provisions and are provided without warranty as described in the Revised BSD License.

~~ii. *Alternate Stream Documents Copyright and License Notice.* In all Alternate Stream Documents (including RFCs and Internet-Drafts):~~

~~Copyright (c) <insert year> IETF Intellectual Property Management Corporation and the persons identified as the document authors. All rights reserved.~~

This document is subject to BCP 78 and the IETF Intellectual Property Management Corporation's Technical Legal Provisions Relating to IETF Documents (<http://trustee.ietf.org/license-info>) in effect on the date of publication of this document. Please review these documents carefully, as they describe your rights and restrictions with respect to this document.

c. *Derivative Works and Publication Limitations.* If a Contributor chooses to limit the right to make modifications and derivative works of an IETF Contribution, then one of the notices in clause (i) or (ii) below must be included. Note that an IETF Contribution with such a notice cannot become a Standards Track document or, in most cases, a working group document. If an IETF Contribution contains pre-5378 Material as to which the IETF IPMC has not been granted, or may not have been granted, the necessary permissions to allow modification of such pre-5378 Material outside the IETF Standards Process, then the notice in clause (iii) may be included by the Contributor of such IETF Contribution to limit the right to make modifications to such pre-5378 Material outside the IETF Standards Process.

i. If the Contributor does not wish to allow modifications, but does wish to allow publication as an RFC:

This document may not be modified, and derivative works of it may not be created, except to format it for publication as an RFC or to translate it into languages other than English.

ii. If the Contributor does not wish to allow modifications nor to allow publication as an RFC:

This document may not be modified, and derivative works of it may not be created, and it may not be published except as an Internet-Draft.

iii. If an IETF Contribution contains pre-5378 Material as to which the IETF IPMC has not been granted, or may not have been granted, the necessary permissions to allow modification of such pre-5378 Material outside the IETF Standards Process:

This document may contain material from IETF Documents or IETF Contributions published or made publicly available before November 10, 2008. The person(s) controlling the copyright in some of this material may not have granted the IETF Trust or IETF Intellectual Property Management Corporation the right to allow modifications of such material outside the IETF Standards Process. Without obtaining an adequate license from the person(s) controlling the copyright in such materials, this document may not be modified outside the IETF Standards Process, and derivative works of it may not be created outside the IETF Standards Process, except to format it for publication as an RFC or to translate it into languages other than English.

d. *BSD License Notification.* In lieu of the complete text of the Revised BSD License set forth in Section 4.c, a person who elects to license a Code Component under the Revised BSD License as described in Section 4.c may use the following notification in the program or other file that includes the Code Component:

Copyright (c) <insert year> IETF Intellectual Property Management Corporation and the persons identified as authors of the code. All rights reserved.

Redistribution and use in source and binary forms, with or without modification, is permitted pursuant to, and subject to the license terms contained in, the 3-Clause BSD License set forth in Section 4.c of the IETF Intellectual Property Management Corporation's Technical Legal Provisions Relating to IETF Documents

(<http://trustee.ietf.org/license-info>).

7. Terms Applicable to All IETF Documents. The following legal terms apply to all IETF Documents:

a. ALL DOCUMENTS AND THE INFORMATION CONTAINED THEREIN ARE PROVIDED ON AN “AS IS” BASIS AND THE CONTRIBUTOR, THE ORGANIZATION HE/SHE REPRESENTS OR IS SPONSORED BY (IF ANY), THE INTERNET SOCIETY, THE IETF TRUST, THE IETF INTELLECTUAL PROPERTY MANAGEMENT CORPORATION, THE INTERNET ENGINEERING TASK FORCE AND ANY APPLICABLE MANAGERS OF ALTERNATE STREAM DOCUMENTS, AS DEFINED IN SECTION 8 BELOW, DISCLAIM ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTY THAT THE USE OF THE INFORMATION THEREIN WILL NOT INFRINGE ANY RIGHTS OR ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

b. The IETF IPMC takes no position regarding the validity or scope of any Intellectual Property Rights or other rights that might be claimed to pertain to the implementation or use of the technology described in any IETF Document or the extent to which any license under such rights might or might not be available; nor does it represent that it has made any independent effort to identify any such rights.

c. Copies of Intellectual Property disclosures made to the IETF Secretariat and any assurances of licenses to be made available, or the result of an attempt made to obtain a general license or permission for the use of such proprietary rights by implementers or users of this specification can be obtained from the IETF on-line IPR repository at <http://www.ietf.org/ipr>.

d. The IETF invites any interested party to bring to its attention any copyrights, patents or patent applications, or other proprietary rights that may cover technology that may be required to implement any standard or specification contained in an IETF Document. Please address the information to the IETF at ietf-ipr@ietf.org.

e. The definitive version of an IETF Document is that published by, or under the auspices of, the IETF. Versions of IETF Documents that are published by third parties, including those that are translated into other languages, should not be considered to be definitive versions of IETF Documents. The definitive version of these Technical Legal Provisions is that published by, or under the auspices of, the IETF IPMC. Versions of these Technical Legal Provisions that are published by third parties, including those that are translated into other languages, should not be considered to be definitive versions of these Technical Legal Provisions.

f. For the avoidance of doubt, each Contributor licenses each Contribution that they make to the IETF IPMC pursuant to the provisions of RFC NEW-5378. No language to the contrary, or terms, conditions or rights that differ from or are inconsistent with the rights and licenses granted under RFC NEW-5378, shall have any effect and shall be null and void, whether published or posted by such Contributor, or included with or in such Contribution.

8. Application to non-IETF Stream Documents

a. *General.* These Technical Legal Provisions have been developed by the IETF Trust for the benefit and use of the IETF community in accordance with the guidance provided in RFC 5377. As such, these Technical Legal Provisions apply to all IETF Contributions and IETF Documents that are in the “IETF Document Stream” as defined in Section 5.1.1 of RFC 4844 (i.e., those that are contributed, developed, edited and published as part of the IETF Standards Process). As indicated in Section 4 of RFC NEW-5378, the IETF rules regarding copyrights (which are embodied in these Technical Legal Provisions) do not by their terms cover documents or materials contributed or published outside of the IETF Document Stream, even if they are referred to as Internet-Drafts or RFCs and/or published by the RFC Editor. The IAB Document Stream, the IRTF Document Stream and the Independent Submission Stream, each as defined in Section 5.1 of RFC 4844 are referred to collectively herein as “Alternate Streams”.

b. *Adoption by Alternate Streams.* The legal rules that apply to documents in Alternate Streams are established by the managers of those Alternate Streams as defined in RFC 4844. (i.e., the Internet Architecture Board (IAB), Internet Research Steering Group (IRSG) Independent Submission Editor), and Editorial Stream. These managers may elect, through their own internal processes, to cause these Technical Legal Provisions to be applied to documents contributed to them for development, editing and publication in their respective Alternate Streams. If an Alternate Stream manager elects to adopt these Technical Legal Provisions and to utilize the IETF IPMC as the licensing administrator for such Alternate Stream, the IETF IPMC will ~~update these~~ publish Technical Legal Provisions for that Alternate Stream to reflect the specific manner in which it will so act, and shall do so consistently with the stated wishes of the Alternate Stream manager to the extent consistent with the IETF IPMC’s legal obligations and the instructions of the IETF community embodied in RFC 5377 and elsewhere.

For each alternate stream that elects to use these Technical Legal Provisions, a separate stream-specific version of these Technical Legal Provisions will be published by the IETF IPMC containing the specifics for that stream.

Alternate streams which have elected to use these Technical Legal Provisions at the time of publishing this version of the TLP are: IAB Document Stream, IRTF Document Stream, and Independent Stream.

Section 9. Template Text

a. Certain RFCs may contain text designated as “Template Text” by the inclusion of the following legend in the introduction to the RFC:

“This RFC contains text intended for use as a template as designated below by the markers <BEGIN TEMPLATE TEXT> and <END TEMPLATE TEXT> or other clear designation. Such Template Text is subject to the provisions of Section 9(b) of the IETF IPMC Technical Legal Provisions.”

b. In addition to the other rights granted under the TLP with respect to each RFC, the Trust grants to all interested persons a non-exclusive, royalty-free, worldwide, perpetual right and license under all copyrights and rights of authors to insert specific information in place of blanks or place-holders in the Template Text, and to reproduce, publish and distribute the Template Text combined with such insertions.
